### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 71-75, 77-88 and 102-110 are rejected under 35 U.S.C. 102(b) as being anticipated by Muenchen et al (US 3,634,807).

Muenchen discloses in Fig. 1 a plurality of substrates conforming to the shape of the substrate 3; Figs. 2-7 shows different configurations; col. 2, lines 69-75 and col. 3, lines 1-4 discloses adjusting to the irregularities of the substrate (since there are many terminals on element 3, it is inherent that there are more than 5 locations of irregularities, such as some terminals are higher than others or curved or many other different configurations) to provide pull and push forces (plurality of forces) to the contact elements to conform to the irregularities and impart selected forces through 4 (it is inherent that due to the irregularities the applied forces will impart different push or pull forces to the different regions); sheet 8 can be adjusted by the user's finger without contacting the devices (see below in the response to arguments); element 3 is a reference structure as well as there can be many more element 3 for reference structures; there is no movement in the parallel direction.

### ***Response to Arguments***

3. Applicant's arguments filed 5/1/06 have been fully considered but they are not persuasive.

Examiner maintains his rejection. Muenchen achieves all the steps. It is inherent, since element 8 is flexible, there are many different scenarios can be devised. While 8 is on 1 or 3, one of ordinary skill in the art hold down 8 with one of the index fingers in the middle and move 8 with another one of the index fingers to adjust the shape (one of them can be considered as the devices to be tested, which is to be occurred in the future, or attached to another devices to be tested in whole or partially). Or one end of element 8 is in partial contact with element 1 or 3, while element 8 that is not in contact is adjusted.

#### *Interviews After Final*

4. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

#### *Conclusion*

5. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any

**amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.**

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (571) 272-4564. The examiner can normally be reached on 5:30 AM to 1:30 PM, Monday through Thursday.

The fax phone numbers for the organization where this application or proceeding is assigned are (571) 273-8300 for regular communications and (571) 273-8300 for After Final communications.
